Comparative Genomics 2018

Practical 1: Basic Genome Analysis

Group number

Group members

Summary

(100-200 words)

Key questions to answer
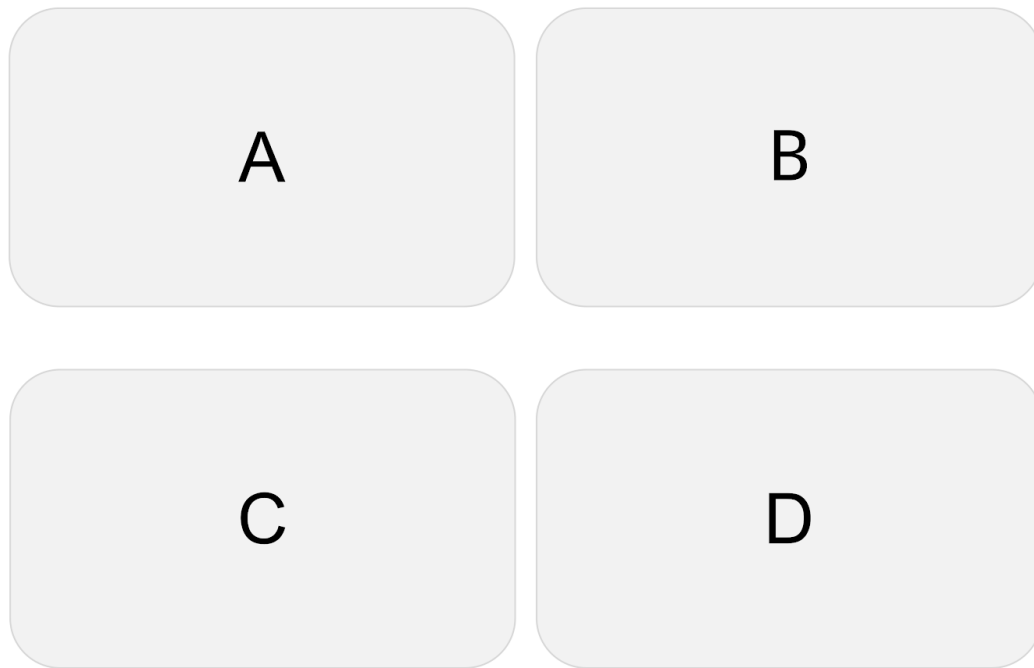

Topic

1.

2.

…

Attachments

For example

Activity 1.1: practicalX_groupX_scriptname1.py

Activity 2.1: practicalX_groupX_scriptname2.py

Formatting guidelines

The text in your report should be in Arial/Helvetica, font size 11pt, and 1.15 line space.

Feel free to include figures and tables to support your explanations; however, add table and figure captions describing shortly the content of the table or figure. Captions of tables should be on top of it, captions of figures below the figure. Ensure that the text in the figure is large enough and readable. If more than one figure is needed, please group them together to save space. For example:

Figure 1. Example of a grouped figure

Do not put entire scripts in the report. The code will be asked as an attachment.

Referencing

Please avoid using Wikipedia references. Instead, we recommend referencing scientific papers. You can find scientific papers via Google scholar (https://scholar.google.se/) or PubMed (https://www.ncbi.nlm.nih.gov/pubmed/)

Length of the report

The report should generally be no more than 5 pages in total, containing 2-4 pages of text.
